SHRI PARASHOTTAM RUPALA

Union Minister (State) – Agriculture

'Mathematics' is essential for life and as I have worked closely with children as a school Principal in early stage of my career, I completely understand the importance of 'Mathematics' in the development of a child's brain.

Vedic Mathematics is a gem of our ancient Indian education system. The Vedic literature has a lot many mentions of mathematical advancements. This magazine, 'Vedic Math World' – is beautifully designed with major focus on Vedic Math tricks, math problems, logical ability enhancing questions, math news from around the world and the learnings from scriptures.

I liked the concept of 3D magazine 'Vedic Math World' designed by Vedic Math Learning System (VMLS) a lot. I am sure, 'Vedic Math World' shall be extremely useful for all the schools/ teachers and students. 'Vedic Mathematics' shall help the readers build a smarter approach, whereas, the tint of Indian scriptures shall make the Indian youth understand the greatness of our country in a better way, which is very much required in today's time.

I congratulate both the editors, Mr. Hardik K Parikh and Ms. Paridhi Trivedi Parikh, and their team for all valid and detailed research for creating this very educative magazine with altogether a new concept.

Best Wishes,

(PARSHOTTAM RUPALA)

Cabinet Minister - Education, Gujarat

'Mathematics' has the ability to empower a person's logical skills. If a child feels happy while solving the math questions, he/she automatically starts developing interest in the subject. 'Vedic Mathematics' does it all for the child. It makes child love math. I would say, it is an 'innovation'.

I congratulate you to bring out this e-Magazine aiming at the genre of 'mathematics' through the medium of Vedic Math Learning System (VMLS). I was very happy to see seven different focus-zones in the magazine dealing with Mathematical Problems, Vedic Math Tricks, Logical skills, Learnings from Indian scriptures, Various puzzles, Latest news and updates about mathematical field and great Indian heritage in the field of math. This content shall be definitely helpful in growing the reader's intellect.

I am sure, this e-magazine shall be extremely useful for the students, teachers, principals, and to everyone who is interested in 'Mathematics' or 'Vedic Mathematics' with the flavour of the knowledge from ancient scriptures.

I, once again congratulate them for their unique initiative and I am sure it shall be extremely useful to the education fraternity.

All the best.
